

AK Token Sui Grant Proposal

Community Utility, MSME Loyalty Pilot, Cultural NFT Storytelling, and Web3 Education for Indonesian Users

Project	AK Token Ecosystem
Founder	Alan Kribo
Current Network	Polygon
Sui Direction	Sui-facing education, cultural NFT storytelling, community onboarding, and utility experir
Funding Request	Initial grant request: 3,000 - 5,000 SUI. Future expansion may be milestone-based.

Executive Summary

AK Token Ecosystem is a community utility project currently operating on Polygon Network. The project connects real-world MSME loyalty experiments, Alan Digital Shop digital products, Lungkomas Frozen Food, cultural NFT collections, public transparency, and Web3 education. This proposal requests support to prepare Sui-facing education, cultural NFT storytelling, community onboarding, and utility pilot documentation for Indonesian users.

Problem and Opportunity

Many Indonesian MSMEs, digital product buyers, and beginner Web3 users still lack simple, practical, and safe blockchain education. Most crypto content focuses on price speculation, while real adoption needs everyday use cases, transparent reporting, and beginner-friendly explanations.

- MSME owners need simple loyalty and reward experiments that do not require complex Web3 knowledge.
- Digital product buyers can be introduced to utility tokens through safe bonus and membership concepts.
- Cultural NFT storytelling can help Web3 feel more local, meaningful, and accessible.
- Public dashboards can make early community experiments easier to verify.
- Sui can be introduced through education, wallet onboarding, NFT concepts, and utility prototypes.

Proposed Solution

AK Token proposes a grant-supported preparation program: create Sui education content, develop a Sui-facing cultural NFT concept page, document a community loyalty pilot model, improve public reporting, and onboard Indonesian community members through safe Web3 learning materials.

Confirmed Distribution	500 AK
Confirmed Recipients	5
Data Source	PolygonScan verified and public website data.json
Last Updated	2026-06-19

Real World Utility and MSME Pilot

AK Token is being tested as a community utility and loyalty experiment connected to selected MSME partners, digital products, food business activity, and community supporters. The goal is to explore practical Web3 participation without promising profit, income, or token price increase.

Recipient	Category	Amount
Ari Guntoro / KRIPIS	Banana chips MSME - Blitar	100 AK
Sidig	Electric bicycle store and sparepart - Bali	100 AK
Enggal	Frozen food reseller - Bali	100 AK
Zain Ranis	Marketing supporter	100 AK
Laminah	Siomay shop MSME - Denpasar	100 AK

The pilot distribution includes MSME partners and community supporters such as banana chips, electric bicycle retail, frozen food reseller, marketing support, and siomay shop participants. Future redeem concepts may include selected Lungkomas products, Alan Digital Shop benefits, or selected partner offers during a controlled pilot.

NFT and Cultural Storytelling

The ecosystem includes six NFT collections under ZOQstudio. These collections create a cultural storytelling layer that can support future Web3 education, membership experiments, and Sui-facing NFT concept exploration.

- Jawa Cosmic Legends

- Zurp #001

- Zurp #002

- Zurp #003 The Foes of Prince Zoq

- Javanese Legends Collection

- Putri Bali

Why Sui?

Sui offers high performance, low transaction costs, and an object-based asset model that is suitable for NFT utility, community reward systems, education experiments, and beginner-friendly onboarding. AK Token currently operates on Polygon; this proposal does not claim official Sui support unless a grant, partnership, or formal approval is granted.

Grant Deliverables

- Create 10 Sui education articles or tutorials for Indonesian users.
- Develop a Sui-facing cultural NFT concept page.
- Design a community loyalty and reward flow prototype.
- Improve public dashboard and grant reporting sections.
- Document MSME loyalty pilot learnings and future redeem direction.
- Onboard at least 100 community members or followers through public education and updates.
- Publish public progress updates through website, dashboard, and X.
- Prepare a final 3-month progress report and next-stage roadmap.

3-Month Timeline

Month	Milestone
Month 1	Sui education content, landing page direction, community introduction, and partner mapping
Month 2	Cultural NFT concept page, reward-flow prototype, MSME pilot documentation, and onboarding
Month 3	Public progress report, dashboard update, final documentation, and next-stage roadmap

Budget Direction

Initial grant request: 3,000 - 5,000 SUI. The budget is directed toward education, public documentation, community onboarding, website/dashboard improvement, NFT concept presentation, and pilot reporting.

Use	Direction
40% Development	Website, dashboard, data reporting, reward-flow prototype, technical setup.
25% Education Content	Sui beginner articles, tutorials, wallet guides, safe Web3 learning content.
20% Community Onboarding	Indonesian user onboarding, MSME discussions, campaign coordination.
10% NFT Visibility	Cultural NFT concept page, storytelling assets, collection visibility.
5% Documentation	Progress reports, screenshots, metrics, final proposal documentation.

Expected Impact

- Introduce Indonesian communities and MSMEs to safer Web3 learning paths.
- Create practical examples of loyalty and reward experiments.
- Build Sui-facing cultural NFT education and storytelling assets.
- Improve public transparency through website, dashboard, and progress reporting.
- Prepare a stronger foundation for future Sui ecosystem participation.

Risk Notes and Disclaimer

AK Token is a community utility project and education experiment. This proposal is for transparency, community presentation, and grant preparation only. It does not guarantee grant approval, token listing, token price increase, income, liquidity, or investment return.

- AK Token currently operates on Polygon Network.
- AK Token is not affiliated with, endorsed by, or officially supported by Sui unless a grant, partnership, or formal approval is officially granted.
- Any future Sui direction is exploratory unless formally approved.
- Community rewards and redeem benefits are utility experiments and may be limited to selected campaigns or partners.
- Swap route visibility does not guarantee liquidity, price stability, profit, or market demand.

Closing Summary

AK Token Ecosystem is ready to present a practical, transparent, and community-focused grant direction: Web3 education for Indonesian users, MSME loyalty experiments, cultural NFT storytelling, and public progress reporting. The project has live public assets, on-chain activity, early MSME distribution, and a clear 3-month execution plan.
